

Reciprocating Wet Ink Imprinter

Greydon's reciprocating wet ink imprinters are precision built. These printers offer the highest quality print along with strength and durability. Well engineered and built in the USA, these printers are ideal for everything from date codes to nutritional, and safe handling information to product descriptions.

GC-225

GC-225 can handle date codes, nutritional information, safe handling information, product description and more. This printer is easily installed on horizontal/vertical and form fill and seal packaging, cartoners, labelers and all intermittent motion packaging machines. The dual flow controls and large air cylinder provide for a smooth consistent stroke which will not be affected by fluctuations in air pressure. The GC-225 also features the remarkable INKAP printhead, which monitors ink absorption and print consistently while extending cartridge life.

- Reciprocating Wet Ink
- 2"x2"
- Up to 75 Cycles Per Minute
- 110 VAC
- 30 P.S.I
- Dry Contact
- GI-10, GI-20, GI-22
- Black, Blue, Red, White, Baby Blue
- Ribbed type

GC-220SS

GC-220SS is constructed entirely of stainless steel, making it ideal for wash down environments. This printer is ideal for everything from date codes to logos. Easily installs on horizontal/vertical form fill and seal packaging, cartoners, labelers and all intermittent motion packaging machines. The dual flow controls and large air cylinder provide for a smooth consistent stroke which will not be affected by fluctuations in air pressure. The GC-220SS also features the remarkable INKAP printhead, which monitors ink absorption and print consistently while extending cartridge life.

LABELING & CODING

GC-4200/6300

GC-4200/6300 offers several features unmatched by printers of the same type. The six-inch by three-inch print area is the largest print area in the industry. This makes it possible to print an entire nutritional mat onto a package. There is savings in operating costs, thanks to low-cost disposable ink cartridges and the INKAP printhead, which monitors ink absorption and print consistency while extending cartridge life. This design is used on a range of applications from date codes to logos, with applications for virtually any substrate.
